16'	Posaune	(Swell)
8'	Trompette	(from 32')
4'	Clarion	(from 32')
8'	Tuba Major	

THE ALEXANDER MEMORIAL ORGAN constitutes one of the great marriages of organ and building in the United States. In 1934, this beloved treasure was given to Grace Cathedral by Harriet Crocker Alexander, daughter of cathedral site donor William H. Crocker, to the glory of God and in memory of her husband, Charles Beatty Alexander. Under the tonal direction of G. Donald Harrison, the Æolian-Skinner Organ Company of Boston designed this gift so as to sound most gloriously in the lively acoustic of the Gothic edifice on Nob Hill, the third largest Episcopal cathedral in the nation.

One of the finest examples of the American Classic school of organ design pioneered by Harrison, the Alexander Memorial Organ enables convincing performances of music from the baroque, romantic, and contemporary eras, organ compositions and transcriptions alike. One may be enthralled by this magnificent organ leading a full congregation with choir and brass on Easter morning, or enchanted as it accompanies a solo choirboy singing “Silent Night” on Christmas Eve.

The Alexander Memorial Organ is heard in more than four hundred services and concerts each year, as well as on weekly webcasts at www.GraceCathedral.org, both live and archived, and on several commercial recordings. In these ways, it transcends the cathedral walls, bringing the gift of music to the San Francisco community, the nation, and the world.

Other Organs at Grace Cathedral

THE CROCKER MEMORIAL ORGAN

Installed in the Chapel of Grace in 1928 by the Æolian Company, this organ was a gift of the William H. Crocker family. In 1951 the organ was extensively rebuilt through the generosity of the Crocker family following a redesigned specification by G. Donald Harrison and Joseph S. Whiteford of The Æolian-Skinner Organ Company. The organ has 28 stops derived from 18 ranks of 1,273 pipes. This organ is in regular use for services in the Chapel of Grace.

THE DAVIS ORGAN

Built around 1860, this four-rank, 182-pipe cabinet organ is thought to be from the shop of William H. Davis, a New York organ builder. It was shipped “around the Horn” and initially installed at St. Paul’s Church, Benicia, California before its restoration and relocation to Grace Cathedral in 1973. Probably the oldest in-use organ in the western United States, this charming instrument is hand-pumped and used on special occasions. It is on display in the south transept.

Your generous financial support enables us to maintain the organs of Grace Cathedral for future generations.
